

AI Software Developer - Fresher

Summary

Bitkraft Technologies LLP is looking for enthusiastic and passionate **AI Software Developer - Freshers** who are eager to build modern software applications using the latest technologies and AI-assisted development tools. The ideal candidate should possess strong full-stack development knowledge, hands-on academic or project experience, and a willingness to learn and adapt in a fast-paced environment.

The role offers an opportunity to work on web and mobile applications, contribute to client projects, and gain exposure to cloud technologies, AI-powered development workflows, and modern software engineering practices.

Essential Skills

- Strong knowledge of modern web application development using **React.js, Vue.js, Angular, or equivalent frontend technologies.**
- Knowledge and Proficiency in backend development using **Python (Django, FastAPI), Node.js, or equivalent technologies.**
- **Project knowledge** of designing and developing REST APIs and Microservices.
- Strong understanding of databases such as **MySQL, PostgreSQL, MongoDB**, or similar.
- Proficiency with **Git** and version control systems.

AI-Assisted Development

Should have knowledge or project experience of:

- AI coding tools such as **Claude, ChatGPT, GitHub Copilot, Codex, Cursor, Windsurf**, or similar.
- Prompt Engineering and Context Management.
- Using AI tools for code generation, debugging, testing, documentation, and automation.
- AI-driven software development workflows and productivity practices.

Cloud, DevOps & Automation (Preferred)

- Knowledge of cloud platforms such as AWS, Azure, or GCP.
- Knowledge of cloud-based deployments and application hosting.
- Understanding of CI/CD pipelines and deployment automation.
- Familiarity with DevOps concepts and release management processes.
- Exposure to Docker, containerization, or orchestration tools is an advantage.

Desirable Skills

- Knowledge of Mobile Application Development (Android/iOS/Flutter/React Native)
 - Exposure to AI/ML integrations, LLM APIs, and automation frameworks
 - Understanding of Agile/Scrum environments
-

- Familiarity with testing frameworks and automated testing practices
- Understanding of software architecture and design patterns

Key Responsibilities

- Design, develop, test, and maintain scalable software applications
- Build and enhance web and mobile applications for global clients
- Utilize AI-powered development tools to improve development speed and code quality
- Work on multiple client projects simultaneously while ensuring timely delivery
- Collaborate with cross-functional teams including Product, Design, QA, and Client stakeholders
- Develop and maintain RESTful APIs and backend services
- Participate in cloud deployments, CI/CD implementation, and automation initiatives
- Troubleshoot, debug, and optimize existing applications
- Conduct code reviews and contribute to development best practices
- Ensure application performance, scalability, security, and maintainability
- Stay updated with emerging AI technologies and software development trends

Qualifications

- Bachelor's degree in Computer Science, IT, or a related field
- Internship Experience - Good to have

Job Location – Fort, Mumbai

Why join Bitkraft?

- Your inputs and opinions are valued
- Exposure to latest technologies
- Working directly with client teams
- International project experience
- You get to see the big picture on the project
- Fast paced environment with quick project completions
- Manage your own time for efficient working
- A friendly and easy going work environment

About Bitkraft Technologies LLP

Bitkraft Technologies LLP is an award winning Software Engineering Consultancy focused on Enterprise Software Solutions, Mobile Apps Development, ML/AI Solution Engineering, Extended Reality, Managed Cloud Services and Technology Skill-sourcing, with an extraordinary track record.

We are driven by technology and push the limits of what can be done to realise the business needs of our customers.

Our team is committed towards delivering products of the highest standards and we take pride in creating robust user-driven solutions that meet business needs.

Bitkraft boasts of clients across over 10+ countries including US, UK, UAE, Oman, Australia and India to name a few.
